VidyoRoom™ and VidyoPanorama™ 600

Anchor Version 3.3.19 (0673)

January, 2017

Doc. Rev B

About VidyoRoom™ and VidyoPanorama™ 600 Anchor Version 3.3.19 (0673)

These Release Notes apply to the following products:

- VidyoRoom HD-2
- VidyoRoom HD-3
- VidyoRoom HD-40 Revision A
- VidyoRoom HD-40 Revision B
- VidyoRoom HD-40 Revision C
- VidyoRoom HD-100 Revision D
- VidyoRoom HD-230 Revision A
- VidyoRoom HD-230 Revision B
- VidyoPanorama 600
- VidyoRoom SE

What's New in This Release

❖ Write Protection Mode feature

- We've implemented a new Write Protection mode feature that adds full File Based Write Filtering. This feature is recommended for deployments where the probability of ungraceful shutdowns is high and where, up until this point, the systems were unable to recover.
- Admins can easily enable Write Protection mode from the Admin UI.

❖ Disable Super Sensitive mode for Phoenix audio devices

- If you want the audio to be processed through your Phoenix audio device, you can now disable Phoenix Super Sensitive mode via the Admin UI. If, on the other hand, you want to hear the audio in its native state, you can enable this mode.
- This feature is useful in cases where you want to hear all the noise coming from a certain location. For example, a nurse at a nurse's station in a hospital might want to enable this mode in order to hear every sound in a patient's room.

❖ View the firmware version of connected devices

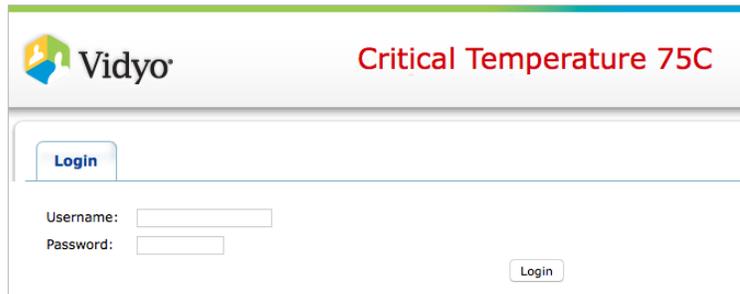

- For your convenience, in addition to displaying the firmware version of INOGENI devices, the Admin UI and the VidyoRoom

On Screen UI now display the firmware version of some Sony® cameras, such as the EVI-H100V and SRG-120DH, as well as some Phoenix devices, such as the Quattro3 and Spider.

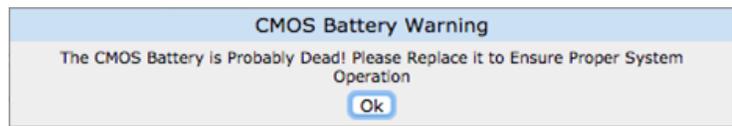

❖ Track the temperature of your VidyoRoom systems

- VidyoRooms now monitor their CPU temperature. If the temperature gets to a high or critical level, the temperature reading appears on the Admin UI page that you are currently viewing so that you can promptly address the issue.
- The temperature is also tracked in a log file. This log file is accessible via the Admin UI, and if you've enabled the Splunk® forwarder feature, it will also be forwarded to your Splunk server.

❖ Receive notification that the CMOS battery needs to be replaced

- If the CMOS battery fails, the system date reverts back a few years. When you attempt to manually correct the date via the Admin UI, the CMOS Battery Warning notification appears to remind you to check if the battery needs to be replaced.

❖ Debug more easily with Recovery Console logs

- To make debugging easier, you can now access the Recovery Console logs on VidyoRoom HD-3, HD-2, and HD-100 Rev 4A models only.
- These logs are accessible via the Admin UI, and if you've enabled the Splunk forwarder feature, they will also be forwarded to your Splunk server.

❖ Resolved issue

- In previous releases, an issue caused VidyoRoom HD-100 Rev 4A and HD-40 Rev A systems to go offline after being online for 50 consecutive days. The systems were then unable to successfully reboot. A fix was added to this release, thereby resolving this issue.

Compatibility

To determine which version of the VidyoPortal™ your VidyoRoom or your VidyoPanorama 600 is compatible with, click [Compatibility Matrix](#), log in to your account on the Vidyo Support Center, and refer to the Software Compatibility Matrix.

VidyoRoom and VidyoPanorama 600 Compatibility Notices

- Version 3.3.19 (0673) of the VidyoRoom client is compatible with the following Vidyo images:

VidyoRoom Family	Vidyo Image
HD-2	HD2-Win64-0_2_20_0_0584.vimage
HD-3	HD3-Win64-0_2_21_0_0572.vimage
HD-40 Revision A	HD40-Win32-0_0_1_15_0084.vimage HD40-Win32-0_0_1_16_0126.vimage HD40-Win32-0_0_1_17_0270.vimage HD40-Win32-0_1_21_5-0673.vimage
HD-40 Revision B	HD40B-Win64-0_0_2_9_0094.vimage HD40B-Win64-0_0_2_12_0126.vimage HD40B-Win64-0_0_2_15_0139.vimage HD40B-Win64-0_2_17_0_0295.vimage

HD-230 Revision B	HD230B-Win64-0_2_19_0_0295.vimage

VidyoRoom Family	Vidyo Image
VidyoPanorama 600	VP600-Win64-0_0_2_9_0101.vimage VP600-Win64-0_0_2_11_0120.vimage VP600-Win64-0_0_2_13_0139.vimage VP600-Win64-0_2_14_0_0295.vimage

Note Vidyo highly recommends that you apply the latest available image when upgrading your VidyoRoom or VidyoPanorama 600. However, before uploading a new image, please check which image version your VidyoRoom system is currently running. If it is already running a newer image, do not downgrade to an older image.

- VidyoPanorama 600 Internet Browser Compatibility: When viewing the Admin UI pages, you must use Internet Explorer® version 9 or later, Google® Chrome™ version 35 or later, Mozilla® Firefox® version 30 or later, or Apple® Safari® version 7 or later.

Resolved and Known Issues

To obtain the list of resolved and known issues for this release, refer to the *VidyoRoom and VidyoPanorama 600 Anchor Version 3.3.19 (0673) Resolved and Known Issues* document.
